

# HTML Exercise

Create local directory and then let them publish it to GitHub.  
Once repository is published, create file with .html extension and then do following exercise.

Create basic html page with following:

- A DOCTYPE tag
- Opening and closing html tags
- Opening and closing head tags nested inside the html tags
- Add title tag
- Opening and closing body tags nested inside the html tags

Example:

```
<!DOCTYPE html>
```

```
<html>
<head>
  <title>Page Title</title>
</head>

<body>

  <h1>This is a Heading</h1>
  <p>This is a paragraph.</p>

</body>
</html>
```

- Create an ordered HTML list (<ol></ol>)
- Create an unordered HTML list (<ul></ul>)
- Add HTML Comment (<!-- -->)
- Code an h1 to h6 tag
- Code <p> and <br> tag
- Write an <a> tag to create a link
-
